

Query generation plan, 27 Feb

Monday, February 27, 2017 6:39 PM

This section can be used to answer "what is" type questions

Note: is might
Need to be
identified in a
question, because
other what type
questions may
include , what
treatment, what
are
causes/symptoms

Words like identify, recognize, test, examine can be mapped to exams and tests section for a disease. This could boil down to matching synonyms

These base words might be used in questions and hence, stemming or lemmatization might be necessary!

Someone might ask: how do I treat or how do I cure diabetes. It might be necessary to generate synonyms of certain words (those that form the query). So that the word cure in a question becomes treatment while querying the data
